Summary

MSBA (STEM) graduate from UC San Diego with 5+ years of hands-on experience in people analytics and data-driven operations across APAC pharmaceutical, healthcare, and finance markets. Proven ability to build analytics systems from scratch, apply statistical modeling (logistic regression, causal inference, predictive analytics), and translate complex data into executive-ready insights. Proficient in SQL, Python, and BI tools; experienced with Workday and Greenhouse for HRIS management. Daily user of AI tools, including Claude and ChatGPT to accelerate research, automate workflows, and deliver smarter analytical solutions. Available immediately.

Education

Master of Science in Business Analytics (STEM), Rady School of Management, UC San Diego 06/2026

Rady Incoming Scholarship (\$22,500) | Courses: Machine Learning, Customer Analytics, Predictive Analytics, Applied Statistics, Fraud Analytics, SQL & ETL, Business Intelligence Systems

Bachelor of Business Administration, Finance, International University in Geneva 07/2019

Bachelor of Science in Business Management (Double Degree), University of Plymouth, United Kingdom

Professional Experience

Data Scientist, FairMoney (MSBA Capstone), San Diego, California 03/2026 – 06/2026

Nigerian digital lending platform; end-to-end analytical project analyzing 4.3M loans.

- Owned full analytical workstream as co-team lead; used Python to clean, validate, and analyze 4.3M loan records, applied Logistic Regression and Twins Matching to quantify causal effect of interest rates on default probability across 3 borrower segments.
- Translated messy raw data into executive-ready insights for FairMoney's data science leadership, supporting pricing decisions across segment $\times$ tenor dimensions.
- Synthesized findings into a structured executive presentation delivered to FairMoney's senior leadership, providing segment-level pricing recommendations across 3 borrower profiles and tenor dimensions.

Recruitment Specialist, Sanofi, Taipei, Taiwan 03/2023 – 07/2025

Global pharmaceutical MNC; people analytics and talent operations partner across 6 APAC markets.

- Built a full recruitment analytics system from scratch in Excel, covering pipeline tracking, talent mapping dashboards, and a compensation benchmarking model to calculate offer packages across 6 APAC markets.
- Owned 50+ concurrent requisitions across APAC, consistently closing 3–4 positions per month while maintaining audit-ready records in Greenhouse and Workday.
- Managed end-to-end pre-employment due diligence including education verification, background checks, reference checks, and documentation compliance.
- Translated multi-market workforce data into executive-ready insights for C-suite and senior leaders to inform regional talent decisions.

Recruitment Consultant, Platinum International Consultant, Taipei, Taiwan 07/2020 – 02/2023

HR advisory firm; talent acquisition and people operations consulting for 30+ corporate clients across APAC.

- Progressed from partnering with sales team on pipelines to independently owning full end-to-end recruitment across sourcing, assessment, offer negotiation, and placement for 15–20 active positions simultaneously.
- Consistently met a monthly placement target of 2+ closes across 30+ corporate clients, generating placement fees of 20–25% of candidates' annual compensation and meeting quarterly revenue targets throughout tenure.
- Standardized recruitment workflows by building SOPs and tracking systems adopted across the team, improving operational consistency and efficiency for concurrent client engagements.
- Designed competency-based assessment frameworks; mentored 3 junior consultants through hands-on case guidance on end-to-end recruitment execution.

Skills & Competencies

- Data & SQL:** SQL (joins, aggregations, window functions), Python (Pandas, NumPy, Scikit-learn, Statsmodels), R, Tableau, Power BI, ETL, Git
- Analytics:** Predictive modeling, causal inference, regression, hypothesis testing, data storytelling, executive presentations
- Generative AI:** Claude (Anthropic) daily use for research, drafting, coding, and workflow automation; ChatGPT, GitHub Copilot
- People Analytics:** Greenhouse, Workday, Notion, employee lifecycle management, headcount reporting, engagement analytics, workforce planning, people data integrity, APAC market expertise
- Languages:** English (Fluent), Mandarin (Fluent), Cantonese (Fluent), French (Basic), Korean (Basic)
